ENERGY & ENVIRONMENTAL ECONOMICS, INC. **Associate**

San Francisco, CA
2006 – Present

- Economic analysis of distributed energy resources including energy efficiency, distributed generation, renewables, and energy storage

CORNERSTONE RESEARCH **Senior Analyst**

Menlo Park, CA
2003-2006

- Played key role on case teams which provided economic and financial analysis of liability and damage issues arising in commercial litigation to support experts, attorneys and their client companies.
- Managed junior analysts by dividing tasks, clarifying research goals, checking assumptions and techniques used, and summarizing project work for the client.
- Generated ideas for conceptualization of research agenda, creation of attorney trial presentations and expert report exhibits.
- Researched and synthesized market and firm information from public filings, industry studies, internal documents, and interviews with client personnel.
- Presented data results and conclusions to managers, experts, and attorneys
- Developed and executed activity-based costing model of real estate organization's theoretical profitability if it were operating as two separate entities; model used to refute claims that firm overcharged customers for services provided.
- Led analysis of competitive market of health care product manufacturer by compiling data from over 10,000 internal client documents and independent industry studies into single estimates of historical market data to evaluate allegations of anticompetitive pricing behavior.

DYNEGY, INC. **Summer Intern**

Houston, TX
Summer 2001

- Worked with team to support traders by recording natural gas futures and options trades in database, verifying accuracy of these records each day, and researching various aspects of natural gas market
- Independently developed a system using Excel macros to improve the reliability and efficiency of team's record checking methodology; implementation of this system led to 10% improvement in time efficiency for team

HOUSTON TECHNOLOGY CENTER
Business Analyst

Houston, TX
Summer 2000

- Produced written evaluations of 17 early-stage companies in life sciences, information technology and energy technology sectors as first point of contact for business plans submitted to the center
- Helped client companies refine and prepare for their pitch to venture capitalists
