ENERGY AND ENVIRONMENTAL ECONOMICS, INC. *Consultant I*

San Francisco, CA

Mr. Fratto joined E3's planning group in 2019, where he helps utilities, system operators, and state agencies prepare for a high renewables future. He joined E3 from the Massachusetts Institute of Technology Energy Initiative (MITei), where his research focused on the valuation of technology that will play a role in the decarbonization of electricity sector and the policy that will support such shifts. His collegiate career was spent between research labs, private industry, and fellowships with the Bureau of Land Management, the Utah Governor's Office of Energy Development, and Iberdrola's Global Regulation Department. Mr. Fratto holds an M.S. in Technology and Policy from MIT and a B.S. in Chemical Engineering and Political Science from the University of Utah.

MASSACHUSETTS INSTITUTE OF TECHNOLOGY *Research Assistant, MIT Energy Initiative (MITei)*

Cambridge, MA
October 2017 – June 2019

- Analyzed the role and value of pumped hydro storage in the electricity dispatch market
- Developed dispatch algorithms for Spain's electricity market in order to evaluate the impact of nuclear power plants and their continued operation

IBERDROLA *Global Regulation Graduate Fellow*

Madrid, Spain
May 2018 – August 2018

- Analyzed Spanish energy markets and nuclear policy through the construction of deep decarbonization scenarios

SUSTINEO *Consultant*

Dublin, Ireland
January 2017 – January 2018

- Implemented environmental (ISO 14001) & energy (ISO 50001) standards for Irish companies to reduce energy usage
- Compiled local, national, and global climate action talking points for consulting presentations

UNIVERSITY OF UTAH *Research Assistant* *Teaching Assistant*

Salt Lake City, UT
May 2011 – August 2017
August 2016 – December 2016

- Teaching Assistant for graduate-level course "Chemical Engineering Process Design" and Guest Lecturer for "Renewable Energy"

- Research Assistant, University of Utah: Institute for Clean and Secure Energy (2017) on the lab-scale operation, maintenance, and study of a chemical looping combustion system; Crus Center for Renewable Energy (2015-17) developing policy education on renewables as well as analyzing solar and storage within Utah; Department of Chemical Engineering (2013) on the mathematical modeling of algae growth to optimize liquid output for biofuels; Henry Eyring Center for Theoretical Chemistry (2011-2012) developing molecular dynamic simulations to characterize the phases of interfacial water

UTAH GOVERNOR’S OFFICE OF ENERGY DEVELOPMENT

Energy Fellow

Salt Lake City, UT
May 2016 – August 2016

- Produced an economic-policy report on the impact of the Utah renewable energy tax credit and residential solar PV
- Facilitated a statewide stakeholder process on the policy future for solar PV

U.S. DEPARTMENT OF THE INTERIOR

Petroleum Engineering Intern

Washington, DC
May 2015 – August 2015

- Identified trends, concerns, program vulnerability, and best practices for Major Undesirable Events on BLM land
- Participated in the internal review and implementation of the Hydraulic Fracturing Rule

Education

Massachusetts Institute of Technology
M.S., Technology and Policy (Energy and Power Systems Emphasis)

Cambridge, MA
2019

University of Utah
B.S., with Honors, Chemical Engineering (Energy Emphasis)
B.S., with Honors, Political Science (Public Policy Emphasis)

Salt Lake City, UT
2017
2017

Citizenship

United States
