ENERGY AND ENVIRONMENTAL ECONOMICS, INC.

San Francisco, CA

Associate

Hannah Platter joined E3 in 2022 and will support E3's work in distributed energy resources. They came to E3 after graduating from Smith College with a double major in Engineering and Jewish Studies. There they completed a capstone project that worked with a local agricultural tech start-up to create a gas separation proof of concept. Hannah brings a research background in Environmental Justice and has worked on research projects through the University of Vermont, including reviewing city plans to evaluate their diversity, inclusion, equity, and justice strengths.

SMITH DESIGN CLINIC / CLEAN CROP TECHNOLOGIES

Northampton, MA

Capstone Design Project

September 2021 – May 2022

- Worked with local start-up to create gas separation and recycling system proof of concept
- Led a team of four as Project Manager in the first quarter, guiding deliverables such as technical memos and public presentations
- Responsible for establishing independent goal setting, long-term project planning, and time management
- Ensured stakeholder needs were met, including EPA and OSHA compliance

UNIVERSITY OF VERMONT, PANIKKAR LAB

Burlington, VT

Research Assistant

May 2021 – August 2021

- Helped create and execute a coding scheme for reviewing city resilience plans to evaluate their diversity, inclusion, equity, and justice strengths
- Analyzed data, created visualizations, and co-authored the corresponding academic paper
- Compiled research summaries on Arctic rural energy transition policy
